THE AUSTRALIAN JOURNAL OF EXPERIMENTAL BIOLOGY AND MEDICAL SCIENCE

VOLUME XLIX

SUBJECT INDEX

Adenine nucleotide metabolism, copper deficiency in the rat, effect on (Gallagher and Reeve), 453.

Albumin synthesis and some biochemical changes in nutritional cirrhosis of the liver, a study of (Chandrasekharan), 383.

Amylase, stability of, in serum from patients with pancreatitis (Howe and Elmslie), 513.

Antibacterial efficiency, the relative, of IgM, IgG and IgA from pig colostrum (Knop, Breu, Wernet and Rowley), 405.

Antibody forming cell assay, a modified, for detecting cells producing a particular class of antibody (Kraft and Wistar), 11.

Antigenic specificities, two, in the Australia antigen (Gust), 625.

Antigens, the cellular and humoral response to, in lambs thymectomized *in utero* (Cole and Morris), 55.

Australia antigen, two antigenic specificities in the (Gust), 625.

Australia antigen, virus-like particles associated with a faecal antigen from hepatitis patients and with (Cross, Waugh, Ferris, Gust and Kaldor), 1.

Bacterial membrane, a genetic approach to the study of (Holloway), 429.

βtrace protein, *see* Protein, βtrace.

Birds, wild, infection of, with Whataroa virus in South Westland, New Zealand, 1964-1969 (Miles, Ross, Austin, Maguire, Macnamara and Ross), 365.

Blood gas changes, arterial, and the diving response in man (Elsner, Gooden and Robinson), 435.

Blood vessels of the upper limb in man, the effect of magnesium sulphate on the (Frewin, Teh and Whelan), 101.

Blood volume, normal, of the rat, a method for measuring the, using [^{125}I] labelled albumin (Brooks), 241.

Book reviews, 125, 244, 313, 425, 531, 639.

9-Butyl-6-thiopurines, the effect of, on enzymes which metabolize purines (Donaldson, Chalmers, Atkinson and Murray), 121.

Caeruloplasmin, and human serum albumin, variants in, in populations from Australia, New Guinea, South Africa and India (McDermid), 309.

Calf, newborn, relative efficiency of absorption of IgG_1, IgG_2, IgA and IgM in the (Brandon and Lascelles), 629.

Calves, newborn, factor in colostrum causing mobilization of free fatty acid in (Gooden and Lascelles), 635.

Carbon tetrachloride, tissue iron in acute and chronic liver damage from (Loh and Juggi), 493.

Cardiovascular control, "optimal", the central nervous system and physiological mechanisms of (Korner), 319.

Catecholamine fluorescence in primate digital arteries (Frewin, Waterson and Whelan), 421.

Catfish serum antibodies, relationship of, to immunoglobulin in mucus secretions (Di Conza and Halliday), 517.

Central nervous system and physiological mechanisms of "optimal" cardiovascular control (Korner), 319.

Cirrhosis of the liver, nutritional, a study of albumin synthesis and some biochemical changes in (Chandrasekharan), 383.

Clonidine, the vascular actions of, in man (Hodge and Robinson), 197.

Cobalt-selenium interactions in the nutrition of the rat (Gardiner and Nicol), 291.

Colony development *in vitro* by bone marrow cells, influence of serum inhibitors on (Chan), 553.

Colony formation, bone marrow, inhibition of, *in vitro* by dialysable products of normal and neoplastic haemopoietic cells (Metcalf), 351.

Colony growth of mouse bone marrow cells *in vitro*, factors from mouse tissues stimulating (Bradley, Stanley and Sumner), 595.

Colony stimulating factor, enzyme treatment of; evidence for a peptide component (Stanley and Metcalf), 281.

Colostrum, factor in, causing mobilization of free fatty acid in newborn calves (Gooden and Lascelles), 635.

Copper deficiency in the rat. Effect on adenine nucleotide metabolism (Gallagher and Reeve), 445.

Copper deficiency in the rat. Effect on liver and brain lipids (Gallagher and Reeve), 453.

Copper deficiency in the rat. Effect on synthesis of phospholipids (Gallagher and Reeve), 21.

Coronary circulation of the transplanted dog heart, inter-relations between the actions of dipyridamole, adenosine, aminophylline and propranolol on the (Paoloni and Wilcken), 537.

Deoxyribonucleic acid, *see* DNA.

Digital arteries, primate, catecholamine fluorescence in (Frewin, Waterson and Whelan), 421.

Dipyridamole, adenosine, aminophylline and propranolol, inter-relations between the actions of, on the coronary circulation of the transplanted dog heart (Paoloni and Wilcken), 537.

Diving response in man, arterial blood gas changes and the (Elsner, Gooden and Robinson), 435.

DNA synthesis, individual cell susceptibility to undergo, in the proliferative response to isoprenaline (Radley and Hodgson), 487.

Ehrlich ascites tumour, resistance of mice to, after immunisation with live *Salmonella enteritidis* 11RX (Hardy and Kotlarski), 271.

Embryo age, influence of, on the expression of the GvH reaction in the chicken embryo (Walker, Schoefl and Lafferty), 237.

Enzyme treatment of colony stimulating factor; evidence for a peptide component (Stanley and Metcalf), 281.

Flurothyl and methoxyflurane, a study of the central action of (Schuck and Shulman), 501.

Free fatty acid, factor in colostrum causing mobilization of, in newborn calves (Gooden and Lascelles), 635.

Ganglionic blockade by rhazidine (Bhattacharya, Chaudhuri and Ganguly), 397.

Genes related to unresponsiveness to bovine serum albumin transfer of, from Sobey to BALB/c mice (Hardy and Kotlarski), 377.

Genetic approach to the study of the bacterial membrane (Holloway), 429.

Gingival blood vessels, human, the histochemical localisation of sympathetic nerve endings in (Frewin, Hume, Waterson and Whelan), 573.

Glucose absorption and glucose tolerance, fasting blood sugar, in the rat, the effects of bilateral destruction of the hypothalmic feeding centre on (Gray), 225.

Golgi membranes, association of, with lipid droplets (pre-chylomicrons) from within intestinal epithelial cells during absorption of fat (Redgrave), 209.

Graft-versus-Host reaction, *see* GvH reaction.

Growth and development of lambs thymectomized *in utero* (Cole and Morris), 33.

GvH reaction in the chicken embryo, influence of embryo age on the expression of the (Walker, Schoefl and Lafferty), 237.

Haemopoietic cells, normal and neoplastic, inhibition of bone marrow colony formation *in vitro* by dialysable products of (Metcalf), 351.

Hand blood flow, the response of, to distant ice application (Jamieson, Ludbrook and Wilson), 145.

Haptoglobin distributions of some Australian urban population samples, a sex-dependent difference in the, with a note on the method of Haldane for estimating the significance of the logarithm of a ratio of frequencies (Brackenbridge), 525.

HbA and HbB type sheep, intact and splenectomized, distribution volumes of labelled red blood cells and labelled protein and "F cells" in (Dooley, Morris and Harris), 129.

Heart of the lizard *Tiliqua rugosa*, the vagal and sympathetic innervation of the (Berger), 297.

Hepatitis patients, virus-like particles associated with a faecal antigen from, and with Australia antigen (Cross, Waugh, Ferris, Gust and Kaldor), 1.

Hepatosplenomegaly, the cellular basis of, in mice bearing skin grafts and its significance. The response of the reticuloendothelial system to skin transplantation (Gotjamanos), 259.

Homograft rejection and hypersensitivity reactions in lambs thymectomized *in utero* (Cole and Morris), 75.

Hydronephrosis, spontaneous, in the inbred mouse strain NZC (Warner), 477.

Hypothalamic feeding centre, the effects of bilateral destruction of the, on fasting blood sugar, glucose absorption and glucose tolerance in the rat (Gray), 225.

Ice application, distant, the response of hand blood flow to (Jamieson, Ludbrook and Wilson), 145.

IgG_1, IgG_2, IgA and IgM, relative efficiency of absorption of, in the newborn calf (Brandon and Lascelles), 629.

IgM, IgG and IgA from pig colostrum, the relative antibacterial efficiency of (Knop, Breu, Wernet and Rowley), 405.

Immunoglobulin determinants on rosette-forming cells: their changing nature during an immune response (Wilson), 415.

Immunoglobulin in mucus secretions, relationship of catfish serum antibodies to (Di Conza and Halliday), 517.

Immunoglobulin, the mechanism of transfer of, into mammary secretion of cows (Brandon, Watson and Lascelles), 613.

Inhibition of bone marrow colony formation *in vitro* by dialysable products of normal and neoplastic haemopoietic cells (Metcalf), 351.

Innervation, the vagal and sympathetic, of the heart of the lizard *Tiliqua rugosa* (Berger), 297.

Iron, tissue, in acute and chronic liver damage from carbon tetrachloride (Loh and Juggi), 493.

Isoprenaline, proliferative response to, individual cell susceptibility to undergo DNA synthesis in the (Radley and Hodgson), 487.

Lambs thymectomized *in utero*, homograft rejection and hypersensitivity reactions in (Cole and Morris), 75.

Lambs thymectomized *in utero*, the cellular and humoral response to antigens in (Cole and Morris), 55.

Lambs thymectomized *in utero*, the growth and development of (Cole and Morris), 33.

Lambs thymectomized *in utero*, the normal lymphocyte transfer reaction in (Cole and Morris), 89.

Lens, embryonic chick, *in vitro* effect of rubella virus on (Harley, Edwards, Filipic and Gupta), 565.

Lens, embryonic chick, toxicity of ouabain to (Gupta, Edwards, Peterson, Filipic and Harley), 305

Lipid, binding of, by soluble and membrane proteins isolated from rat liver (Fidge), 153.

Lipid droplets (pre-chylomicrons) from within intestinal epithelial cells, association of Golgi membranes with, during absorption of fat (Redgrave), 209.

Lipids, liver and brain, copper deficiency in the rat, effect on (Gallagher and Reeve), 453.

Lipoprotein, rat plasma very low density, *in vivo* transformation of, into higher density lipoproteins (Fidge and Foxman), 581.

Liver damage, acute and chronic, from carbon tetrachloride, tissue iron in (Loh and Juggi), 493.

Liver injury, acute, plasma membranes in, Biochemical changes induced by carbon tetrachloride (Le Page and Dorling), 345.

Lizard, *Tiliqua rugosa*, the vagal and sympathetic innervation of the heart of the (Berger), 297.

Lymphocyte transfer reaction, the normal, in lambs thymectomized *in utero* (Cole and Morris), 89.

Lymphoid tissues, rat, evidence for the utilization of preformed purines by: implication to immunosuppression by 6-thiopurine analogues (Chalmers, Atkinson, Burgoyne and Murray), 177.

Magnesium sulphate, the effect of, on the blood vessels of the upper limb in man (Frewin, Teh and Whelan), 101.

Mammalia, native Australian, thiol distribution in the plasmas of (Fantl), 521.

Mammary secretion of cows, the mechanism of transfer of immunoglobulin into (Brandon, Watson and Lascelles), 613.

Methoxyflurane and flurothyl, a study of the central action of (Schuck and Shulman), 501.

Mice, transfer of genes related to unresponsiveness to bovine serum albumin, from Sobey to BALB/c (Hardy and Kotlarski), 377.

Molecular charge, the effect of, on the uptake of protein by cultured mammalian cells (Lafferty and Dickson), 167.

Mouse strain NZC, inbred, spontaneous hydronephrosis in the (Warner), 477.

Mouse tissues, factors from, stimulating colony growth of mouse bone marrow cells *in vitro* (Bradley, Stanley and Sumner), 595.

Mycoplasma pneumoniae antigen and bovine antisera to *Mycoplasma mycoides* var. *mycoides*, observations on the cross reaction between (Buttery and Etheridge), 233.

Nutrition of the rat, cobalt-selenium interactions in the (Gardiner and Nicol), 291.

Ouabain, toxicity of, to embryonic chick lens (Gupta, Edwards, Peterson, Filipic and Harley), 305.

^{32}P uptake in rat renal tissue, effects of parathyroid extract and glycerol on (Geary and Cousins), 463.

Pancreatitis, stability of amylase in serum from patients with (Howe and Elmslie), 513.

Parathyroid extract and glycerol effects of, on ^{32}P uptake in rat renal tissue (Geary and Cousins), 463.

Phospholipids, copper deficiency in the rat, effect on synthesis of (Gallagher and Reeve), 21.

Plasma membranes in acute liver injury. Biochemical changes induced by carbon tetrachloride (Le Page and Dorling), 345.

Pre-chylomicrons, *see* Lipid droplets.

Pressure-flow curves for human skin, the effect of the thermal environment on (Ludbrook), 185.

Protein antigen of *Vibrio cholerae*, quantitative assay of a, involved in the vibriocidal action of antibody and complement (Neoh and Rowley), 605.

Protein, βtrace, studies on (Penny and Osserman), 111.

Protein, labelled, red blood cells, labelled and "F cells", distribution volumes of, in intact and splenectomized HbA and HbB type sheep (Dooley, Morris and Harris), 129.

Protein, uptake of, by cultured mammalian cells, the effect of molecular charge on the (Lafferty and Dickson), 167.

Purines, preformed, evidence for the utilization of, by rat lymphoid tissues: implication to immunosuppression by 6-thiopurine analogues (Chalmers, Atkinson, Burgoyne and Murray), 177.

Red blood cells, labelled, and labelled protein and "F cells", distribution volumes of, in intact and splenectomized HbA and HbB type sheep (Dooley, Morris and Harris), 129.

Renal tissue, rat, effects of parathyroid extract and glycerol on ^{32}P uptake in (Geary and Cousins), 463.

Resistance of mice to Ehrlich ascites tumour after immunisation with live *Salmonella enteritidis* 11RX (Hardy and Kotlarski), 271.

Reticuloendothelial system, the response of the, to skin transplantation. Phagocytic indices and weights of reticuloendothelial organs of mice bearing primary skin isografts and allografts (Gotjamanos), 249.

Reticuloendothelial system, the response of the, to skin transplantation. The cellular basis of hepatosplenomegaly in mice bearing skin grafts and its significance (Gotjamanos), 259.

Rhazidine, ganglionic blockade by (Bhattacharya, Chaudhuri and Ganguly), 397.

Rosette-forming cells, immunoglobulin determinants on: their changing nature during an immune response (Wilson), 415.

Rubella virus, *in vitro* effect of, on embryonic chick lens (Harley, Edwards, Filipic and Gupta), 565.

Salmonella enteritidis 11RX, live, resistance of mice to Ehrlich ascites tumour after immunisation with (Hardy and Kotlarski), 271.

Serum albumin, human, and caeruloplasmin, variants in, in populations from Australia, New Guinea, South Africa and India (McDermid), 309.

Serum inhibitors, influence of, on colony development *in vitro* by bone marrow cells (Chan), 553.

Skin, human, the effect of the thermal environment on pressure-flow curves for (Ludbrook), 185.

Skin transplantation, the response of the reticuloendothelial system to. The cellular basis of hepatosplenomegaly in mice bearing skin grafts and its significance (Gotjamanos), 259.

Skin transplantation, the response of the reticuloendothelial system to. Phagocytic indices and weights of reticuloendothelial organs of mice bearing primary skin isografts and allografts (Gotjamanos), 249.

Sympathetic nerve endings, the histochemical localisation of, in human gingival blood vessels (Frewin, Hume, Waterson and Whelan), 573.

Thiol distribution in the plasmas of native Australian mammalia (Fantl), 521.

Thymectomized *in utero*, lambs, homograft rejection and hypersensitivity reactions in (Cole and Morris), 75.

Thymectomized *in utero*, lambs, the cellular and humoral response to antigens in (Cole and Morris), 55.

Thymectomized *in utero*, lambs, the growth and development of (Cole and Morris), 33.

Thymectomized *in utero*, lambs, the normal lymphocyte transfer reaction in (Cole and Morris), 89.

Tiliqua rugosa, *see* Lizard.

Toxicity of ouabain to embryonic chick lens (Gupta, Edwards, Peterson, Filipic and Harley), 305.

Transplanted dog heart, inter-relations between the actions of dipyridamole, adenosine, aminophylline and propranolol on the coronary circulation of the (Paoloni and Wilcken), 537.

Vascular actions of clonidine in man (Hodge and Robinson), 197.

Vibrio cholerae, quantitative assay of a protein antigen of, involved in the vibriocidal action of antibody and complement (Neoh and Rowley), 605.

Virus-like particles associated with a faecal antigen from hepatitis patients and with Australia antigen (Cross, Waugh, Ferris, Gust and Kaldor), 1.

Whataroa virus, infection of wild birds with, in South Westland, New Zealand, 1964-1969 (Miles, Ross, Austin, Maguire, Macnamara and Ross), 365.
